Ai systems

Your All-In-One Marketing Command Center Starts Here

Ai Systems offers enterprise grade power minus the insane expense and complexity

Affiliate Engine: Capitalize on the power of referrals with your fully customizable built in affiliate platform. Unlock exponential earnings by offering affiliates the opportunity to earn commissions from your own creations not just on their direct referrals by up to seven levels deep maximizing your earning potential. Decide if you want to pay % or a flat fee for your commission structure, and integrate it all directly into your community where they can view their own dashboard to access their customized links, leads generated, customers, commissions and access any approved media to assist them with your promotions.

AI Ads Engine: Run ads with AI. No experience required. Advertise like a pro, fast! Our AI Ads Engine doesn't just make advertising easier; it makes it better! In seconds, anyone can promote their brand, product or idea with as little as $1 /day.

AI Content Engine (Built-In Content AI): AI powered software that generates ad copy, product descriptions, sales copy, blog paragraphs, video scripts, emails, images and more. With our AI Content Engine, you'll experience twice the speed and effortless quality with your content creation.

Automation Engine: Behavioral Dynamic Response Marketing - The Holy Grail. If you don't know what this is, it's giving unique and specific content to prospects or customers based on their actions. It's basically giving your audience a uniquely personalized experience based on what they do. In a world where most prospects and customers see the same marketing and sales messages over and over, behavioral dynamic response marketing is far superior in the sense each person will get a more uniquely tailored message that applies to them specifically, based on their previous actions.

Ai systems

Community Engine: Facebook groups are dying as they limit your reach to your members, but not to worry with the unlimited reach of the community engine. Say goodbye to the frustration of posts getting lost in the algorithm with your own custom community platform. Ensure every member receives relevant updates, content, and foster a vibrant community leveraging the leaderboard feature where it encourages your members through gamification. Or segment out different channels to ensure your messages reach the right audience at the right time in this centralized hub.

Course Engine: Seamlessly integrate your own personalized learning experience directly into your community so your members have easy access to valuable educational resources. Build freemium and premium where you have control over your pricing, and open up a collaborative learning environment to build social proof on your courses. Decide if you want to have all members see each comment made on each lesson, or manually approve the comments made so you can moderate which comments go public and which you can answer in private to cultivate an empowering experience with your course engine. Track student progress, build quizzes to support absorption, design your own certification on completion, even automate their next steps with content dripping and personalized messaging to encourage them along the way.

CRM Engine: Contact Relationship Management. Create contact records, log sales activities, track engagement as leads interact with your sales and marketing materials. Track and view previous interactions so that you can speak to your leads exactly where they are.

Funnel Design Engine: The Funnel is the secret to your online success. Our Funnel Design Engine gives you everything you need. Run your professional affiliate campaigns online with our fully customizable drag and drop page builder, allowing anyone to be successful with funnel design, without advanced funnel design skills.

Meta Messenger Engine: Your customers are on Meta. Our Meta Messenger Engine helps you automate getting and keeping customers happy, so you have more time for everything else.

Payments Engine: Streamline your transactions, our Payments Engine is built directly into your Ai Systems to provide a convenient, hassle-free buying experience for your prospects. Leverage the efficiency of Apple Pay and Google Pay so your new customers

Ai systems

Reporting Engine: Stop guessing. Know your numbers. With our reporting engine you can see exactly how your marketing is performing. NOW. See where your best returns are coming from so you can focus your efforts on what's working and cut what isn't.

Scheduling Engine: Give your clients a better booking experience. Stand out from your competitors with a completely customized scheduling experience.

Smart Links Engine: With our Smart Links Engine, not only will you know where every click comes from, but you can trigger dynamic text, email, or social marketing campaigns based off of a single click inside our CRM.

Social Engine: Effortlessly plan, organize and deliver content and campaigns across social networks. Jumping back and forth between networks is a huge time-sink. Consider how the bulk of brands out there are publishing content to multiple social platforms. With our Ai Systems Social Engine, you can publish your latest Facebook post, Instagram photo or Tweet simultaneously.

Survey Engine: Segment your leads with surveys based on their interests. With the ability to segment your leads based on their interests and feedback you can create more specific targeted marketing messages for each segment of your market automatically.

Task Engine: With our Task Engine, you can dynamically create tasks and reminders for you or your sales team based on where your leads are in your sales pipeline. Never leave a dollar on the table again with our Task Engine combined with our Sales Pipeline Manager.

Text Messenger Engine: Build meaningful relationships in real-time. Drive revenue the easy way with SMS automation. Send and receive text messages that nurture your leads and drive revenue.

Feature Breakdown

Here is a breakdown of the amazing features available to Ai Systems subscribers:

24/7 Live Chat Support: Need help? Just ask. 24/7/365 live chat support.

Ai Affiliate Campaigns: As a Member of Ai Systems you will gain access to our Exclusive Affiliate Network where you can earn upwards of $1,000 per sale on various proven offers ready to convert. As a Pro member of Ai Systems you will receive new complete affiliate campaigns you can deploy on a regular basis. Ad creatives, funnels, triggers, automations, all completely built and ready to deploy directly from our team of copywriters, media buyers, funnel designers and automation specialists.

AI Content Engine (Built-In Content AI): AI powered software that generates ad copy, product descriptions, sales copy, blog paragraphs, video scripts, emails, images and more. With our AI Content Engine, you'll experience twice the speed and effortless quality with your content creation.
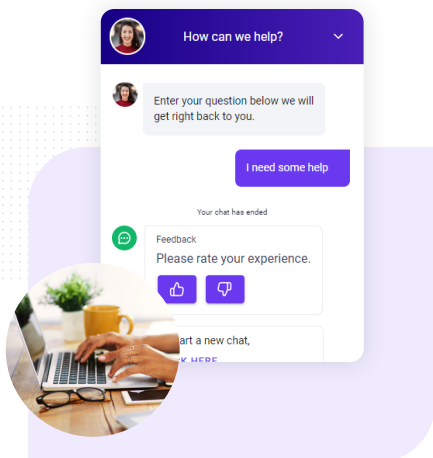

AI Copy Coach: With our AI Copy Coach you will always have fresh sales-focused copy read to convert your traffic and leads into repeat customers. The positioning module is designed to craft compelling narratives that differentiate you from your competitors - even in an oversaturated, super competitive market. Neuro-linguistic programming (NLP)-based prompts create high-converting email sequences, sales copy and everything in between.

AI Sales Agents (Conversational AI): Imagine having an army of sales agents guiding your leads through your sales pipeline where you can train one and the rest follow. Remove yourself as the bottleneck and plug in 24/7 sales agents that engage leads in SMS, DM's, and website Live Chat around the clock and break free from one-on-one interactions. Your sales agent army will guide your leads to the next step, handle objections, even book appointments for you so you can focus on the highest income producing activities in your business. Unleash true business growth and supercharge your sales process, accelerating your lead conversion and propelling your business to new heights.
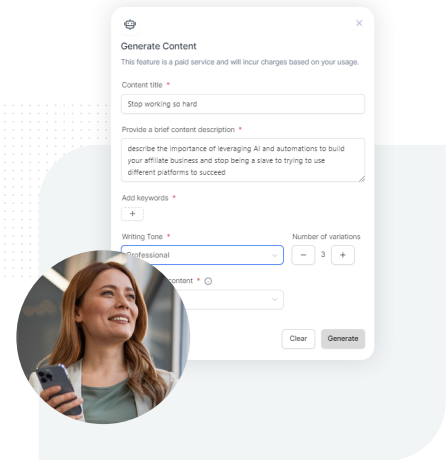

AI Support Agent (Conversational AI): Eliminate the repetitive tasks of answering FAQs and general support questions by training your AI Support Agents to assist you with suggestive message replies, or turn to full auto pilot mode with handling common queries from your leads and customers. Day or night, weekend or holiday with your loved ones, your AI Support Agent will be there taking care of the heavy lifting and keeping your leads and customers happy without having to lift a finger while your Support Agents ensure your business is always moving forward.

Campaign Specific Training: With every complete campaign we provide, we want to ensure you know exactly how to use it - who the ad creatives are designed for, the best traffic sources to use them for, how the funnel flows, how the automations work, how the sales pipeline is set - so that you can get it up and running quickly.
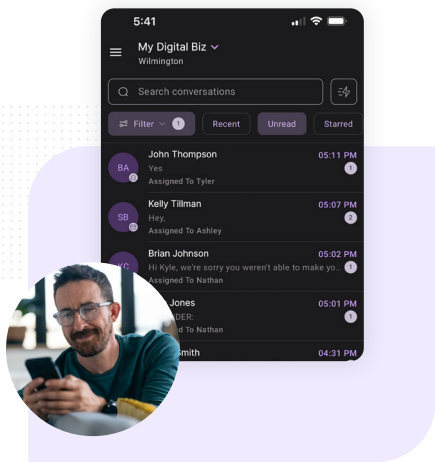

"Click to Close" Automation Recipes: Customize every step of your process with pre-written copy and fully automated follow up strategies to modulate into ANY campaign that have been battle-tested and optimized since the advent of dynamic response marketing. Fully customizable recipes include:

- **The 7 Day Sales Sequence.** Turn new email subscribers into customers with this pre-built and fully automated sequence that follows up and makes your offer for seven days. Simply edit the pre-written copy to match your offer and you're ready to go! Perfect for turning new subscribers into customers.

- **The "Comeback" Sequence.** Use this sequence when people start to order from you, but leave before they complete their purchase. Simply edit the pre-written messages and the system will follow up by email (and text if you want) and get them to come back and buy...automatically.

- **The "Hand Raiser" Sequence with AI Deadline.** Get your prospects to SHOW you they're interested in your offer by opening an email with a subject line that's all about your offer. When they open it, the AI puts them into a new email sequence with a deadline so you can get more sales using scarcity. Simply edit the pre-written emails, press "send" and let the system do the heavy lifting.

- **The Abandon Cart Sequence with AI Deadline.** Use the power of urgency and scarcity to turn your abandoned carts into customers by using a deadline. If someone starts to order but leaves without completing the sale, the system will automatically follow up and let them know your offer is expiring. Simply edit the pre-written emails and the system will follow up by email (and text if you want) and get them to come back and buy...automatically.

- **The "Watcher" Sequence with AI Deadline.** This campaign sends a series of emails to your prospects with links to content about your offer. The system "watches" your prospects to see if they click any of the links. When they do, it sends them a series of deadline-based emails that use the power of scarcity and urgency to get them to take action and buy. All of the automations and "tech stuff" are pre-done, simply edit the emails and you're ready to go!

- **The "Flash Sale" Sequence with AI Deadline.** "Flash Sales" are an amazing way to generate sales from your list fast. This fully automated campaign is ready to use whenever you want. All of the automations and "tech stuff" are pre-programmed. Simply edit the pre-written emails and the system will announce your Flash Sale ...and then deploy a deadline sequence to get even more sales.

- **The On-Demand Class Sequence for Direct Sales with Replay Sequence and AI Deadline.** There's no question that webinars work. This campaign uses AI to: (1) invite your leads to the webinar; (2) keep track of who registered; (3) send out replay links; and (4) send an AI deadline to everyone who didn't buy. All of the automations and "tech stuff" are already built. Simply edit the pre-written emails and you're good to go!

- **The "New Offer Announcement" Sequence.** Want to tell your list about a new offer? That's what this campaign is for! It sends a series of emails over the course of several days and tells your list about your new offer. It can even keep track of who buys and automatically remove them from the campaign so they don't keep getting "sales" emails after they've purchased.

- **The "Appointment Getter" Sequence.** Need people to book a call with you or someone on your sales team? This campaign can make it happen. The pre-written copy templates are specifically designed to get your prospects to book a call with you ASAP. All of the automations and "tech stuff" are already built. Simply edit the pre-written emails and put this sequence into action for you.

- **The "High Ticket" Webinar Sequence with Replay Sequence and AI Appointment-Getter.** Webinar funnels are perfect for selling high-ticket products and offers...and that's exactly what this campaign does. It invites prospects to an on-demand webinar, tracks those who register, sends out replays and sends a "book a call" sequence to registrants (but doesn't book a call). All of the automations and "tech stuff" are already built, simply edit the pre-written emails and start utilizing this sequence.
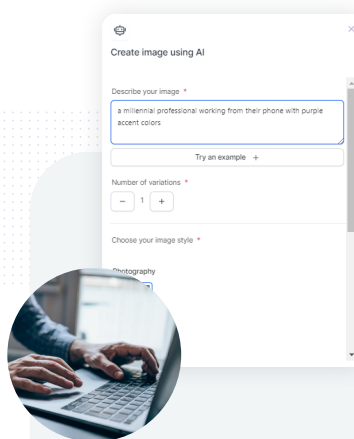

- **The "High-Ticket Watcher" Sequence with AI Appointment-Getter.** This campaign sends a series of emails to your prospects with links to content that's relevant to your high-ticket offer. The system "watches" your prospects to see if they click any of the links. (Clicking to see your content is a great indicator that they're interested in the solutions you can provide.) When they click, the AI takes over and sends them a series of emails inviting them to book a call with you or your team. All of the automations and "tech stuff" are pre-done, simply edit the emails and get started!

- **The Automated Project Launch Sequence with Early Bird Sequence and AI Deadline.** This one takes your subscribers and puts them into a completely automated "Product Launch Formula" style campaign by sending a separate series of emails for each of your Product Launch Videos, using AI to track who watches the pre-launch content (and send them the next piece of content faster). It adds super-interested prospects to an "early bird" list, using AI to send the "early bird" list a special "early access" series, deploying an AI deadline to all prospects and sending them to the main sales page. Everything is pre-programmed and all the "tech stuff" is already done. Just edit the pre-written emails and go!

"Click to Close" Funnel Recipes: Nine Pre-built high converting funnel templates with payment checkouts built in right out of the box including:
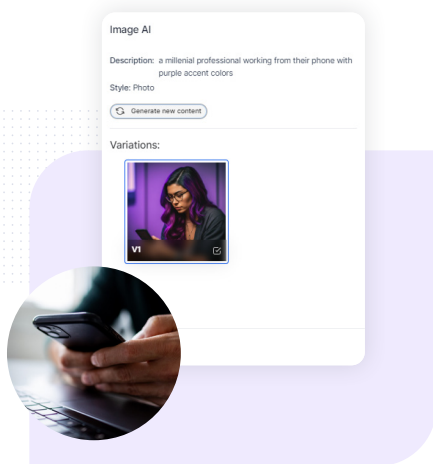

- **The Classic Tripwire Funnel with Order Bumps and Upsells.** The sales page template for this funnel has been perfected after (literally) sending millions of visitors to it for years. It also comes with a two-step order form so you can put your cart-abandoners into a cart-abandon campaign, automatically. It's pre-configured with order bumps and high-converting one-click upsell pages. Great for cold traffic or use it with our pre-built 7-day sales sequence. Just add your sales copy and go!

- **The Flash Sale Funnel with Order Bumps and Upsells.** This funnel is perfect for flash sales and other special promotions like Black Friday and Cyber Monday. The sales page template is modeled after one of the most successful Flash Sale promotions in recent years...and it's still being used today. Comes with two-step order form, order bumps, and one-click upsells. All you need to do is edit the copy and you're good to go! Great to use with retargeting traffic or use it with our pre-built Flash Sale campaign with AI deadline!

- **The Classic Book Funnel with Order Bumps and Upsells.** The most successful marketers on the planet use book funnels for a reason. THEY WORK. The sales letter template for this Book Funnel has been used to sell over 100,000 books (and counting.) The funnel comes with a two-step order form, order bumps, and one-click upsells. Simply edit the copy and go! Great to use with cold traffic, our pre-built 7-day sales campaign, our pre-built new product announcement campaign, or our pre-built "watcher" campaign with AI Deadline.

- **The Three-Pitch Product Launch Funnel with Order Bumps and Upsells.** This funnel gives you everything you need to automate a classic "Product Launch Formula" launch. It comes with an opt in page where people can opt in to your pre-launch sequence, three video pages for your pre-launch content (with an early bird opt-in form on each one), an early bird sales page and a "main" sales page. Plus, it has order bumps and one-click upsell pages so you simply add your own content and you're good to go! Perfect to use with cold traffic or our pre-built Product Launch campaign with Early Bird AI and AI Deadline!

- **The "On Demand Class Funnel" for Direct Sales and High Ticket (comes with Registration, Broadcast, Replay, Order Form, Upsell, Application, and Scheduling Pages).** "On-Demand Class" funnels are like automated webinars …but better. Instead of trying to "trick" prospects into thinking they're on a live event (and making them wait until they can watch it), the On-Demand Class funnel increases conversions and trust by giving them instant access to your webinar. It comes with a registration page, a broadcast page, a replay page, plus a sales page with a two-step order form, order bumps, and one-click upsells. The high-ticket version comes with an application page and a scheduling page. Just add your own content and copy and you're ready to roll! Perfect to use with cold traffic or our pre-built on-demand class campaigns!
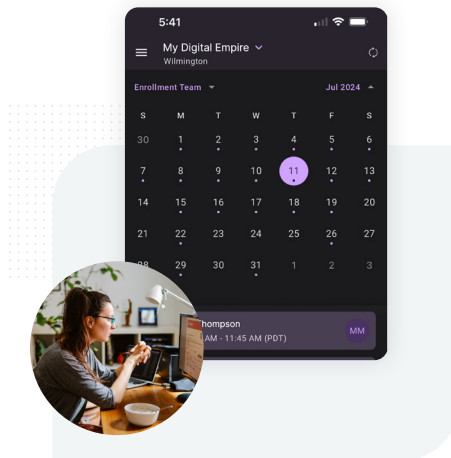

- **The Free Challenge Funnel with Registration Page, V.I.P. Sales Page, Order Bumps, and Upsell Pages.** Running free challenges is a great way to build your list, bond with them, and make sales. This funnel comes with a proven registration page template, a VIP sales page template with a two-step order form and order bumps, and it comes with one-click upsell pages. Just add your copy and content and go! Perfect to use with cold traffic or our pre-built new announcement campaign!
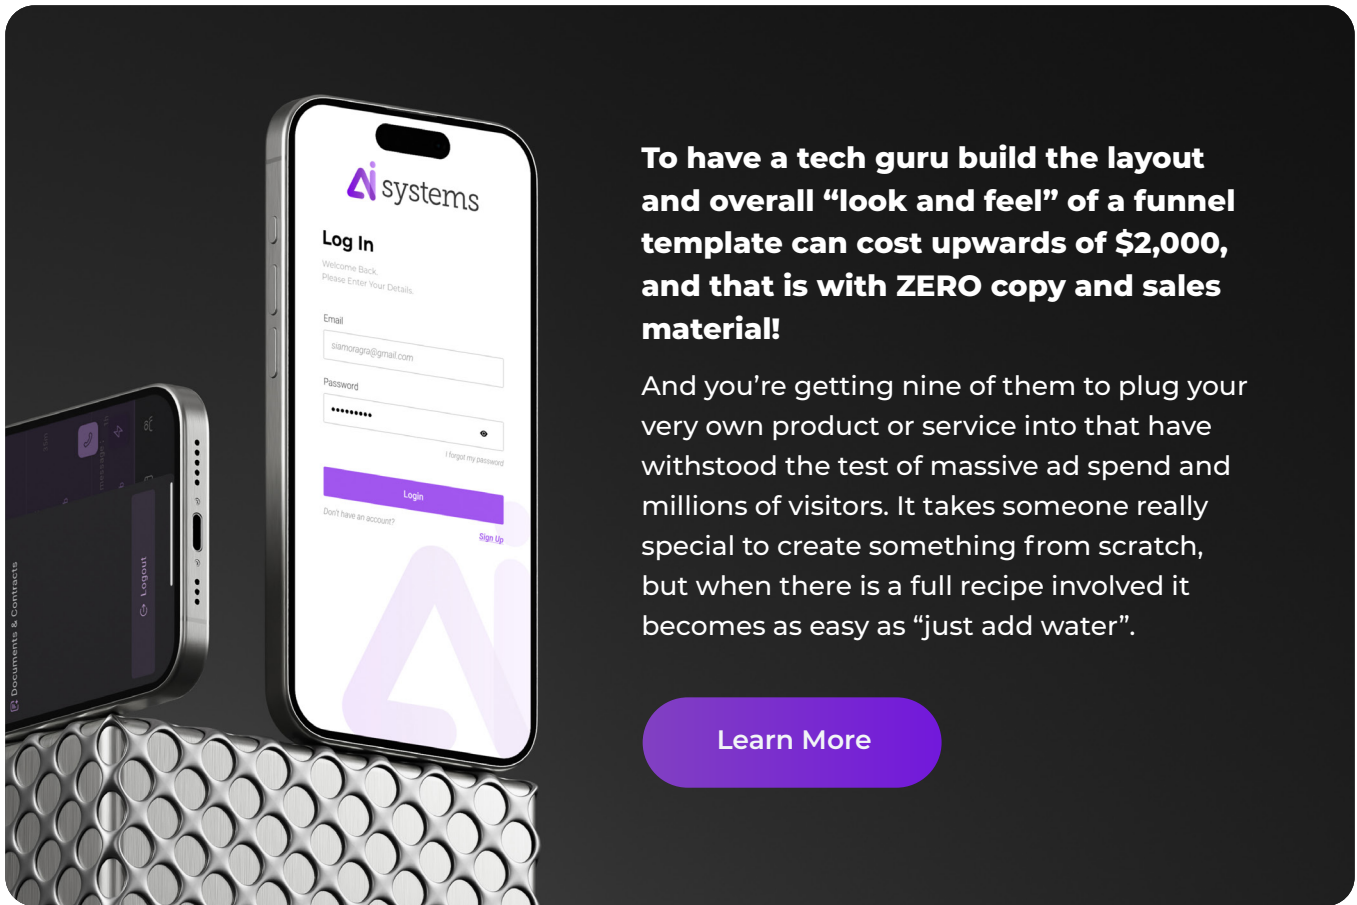

- **The Agency Sales Letter Funnel with Sales Letter Page, Application and Scheduling Page.** This funnel uses the same direct response sales letter template that was used to scale three different agencies, fast. It's simple, clean, and it works. The sales letter itself has an application form built in so you can qualify prospective clients before you meet with them. It also comes with a scheduling page so your prospects can book a call easily. Great for use with cold traffic or our pre-built new announcement campaign, our appointment-getter campaign, or all three! Just edit the copy and content and you're ready to go!

- **The Paid Challenge Funnel with Sales Page, V.I.P. One-Click Upsell Page, Two-Step Order Form, Order Bumps, and more.** Paid challenges are a great way to get new email subscribers and monetize them at the same time. This funnel comes with a sales page template, a two-step order form with order bump, a one-click upsell page for VIP access, and additional one-click upsells. Just add your copy and content and go! Great for use with cold traffic or use it with our pre-built new announcement campaign!

- **The Bonus Bundle Funnel with Sales Page, Two-Step Order Form, Order Bumps and One-Click Upsells.** This funnel is designed to turn subscribers into customers by offering an irresistible combination of bonuses. The sales page template has been proven after thousands of conversions It comes with a two-step order form with order bumps and one-click upsell pages. Use this with our pre-built deadline campaign and watch customers come running. New funnels are being added all the time and you can also create your own web pages (and funnels) from scratch with our super-easy funnel builder. (It's what we used to build this page!)

To have a tech guru build the layout and overall "look and feel" of a funnel template can cost upwards of $2,000, and that is with ZERO copy and sales material!

And you're getting nine of them to plug your very own product or service into that have withstood the test of massive ad spend and millions of visitors. It takes someone really special to create something from scratch, but when there is a full recipe involved it becomes as easy as "just add water".

Learn More

But we're still not done.
We're giving you even MORE ways
to turn your leads into sales!
